SPIDER®

SPIDER® is the most effective electric Fly Catcher machine that uses the principle of UV light to attract and silently trap flies and other flying pest insects. In conventional models, as a result of research, it has been found that insect debris can travel outside the area which could lead to contamination. "Spider®" attends to this problem and is designed specifically for food handling and processing industry.

Designed for restaurants, fast food establishments, food production, commercial kitchens, supermarkets, bars.

HOW DOES IT WORK?

Spider® attracts flying insects through UV light and traps them permanently on two special glue boards inside the machine. Unlike other such products, Spider® uses patented Translucent Technology® (TT®) that disperses light at 180 degrees, improving the attraction and subsequent catch. Spider® complies to international standards. Its glue boards help to monitor types and number of insects regularly which will help in compliance with HACCP.

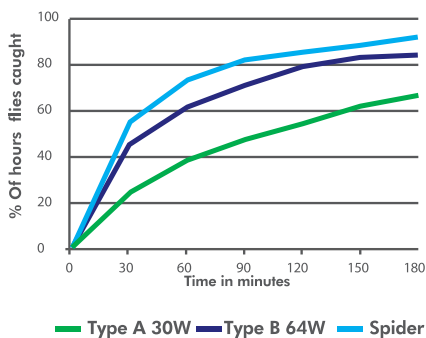

Spider® Machine

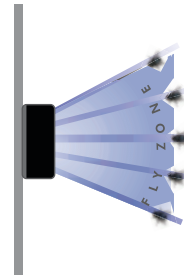

Glueboard with catch

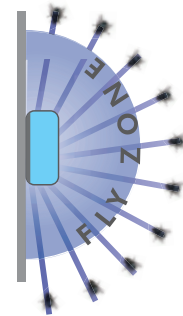

SPIDER® CAUGHT 74% OF FLIES WITHIN ONE HOUR

TRANSLUCENT TECHNOLOGY™ ALL-ROUND ATTRACTION

NON TRANSLUCENT UNIT:
LIMITED RANGE OF ATTRACTION

TRANSLUCENT UNIT:
ALL ROUND ATTRACTION

PRODUCT FEATURES:

- INTERNATIONAL STANDARDS (HACCP COMPLIANT)
- USES TRANSLUCENT TECHNOLOGY® (TT®), CATCHES 30% FASTER
- SAFE - NO RISK OF ACCIDENTAL ELECTRIC SHOCK
- LARGE CATCH AREA: GLUE BOARDS LAST MUCH LONGER!
- NO 'ZAPPING' SOUND, NO UNWANTED NOISE
- HYGIENIC - NO FRAGMENTATION OF INSECTS, HENCE NO CONTAMINATION HAZARD
- UNITS WITH SLEEVED TUBES ARE ALSO AVAILABLE
